

TARIFF PICTURES.

In 1872 this country was collecting \$5 23 per capita in duties on imports. That was under the war Tariff. Under the McKinley law in 1892 we collected \$2 66

per capita. How can that be "a worse than war Tariff?"

—New York Press.

The indicted Brooklyn officials have appealed to the Legislature to legalize the shameful misdeeds for which they have been presented to the Grand Jury. They know their friends.

Now that Great Britain has prohibited the importation of woolen rags because of fear of cholera, perhaps some of our "Tariff Reform" friends will be reconciled to similar action here.

There can be no misunderstanding concerning Mr. Cleveland's polite declaration of the free pass offered to him by one of the express companies. It means, no doubt, that Mr. Cleveland expects to be fully able to express himself on all occasions.

Some objection is made to the term "in evidence," in the sense of signifying that a person is visible, or present or in attendance, on the ground that it is merely an affectation. But be that as it may, the fact remains that a person who is "in evidence" must not be described as "out of sight."

If Mr. Carlisle accepts that proffered Cabinet portfolio many of his friends will regard it as signifying that he no longer considers himself a quantity in the Presidential problem. The Secretaryship of the Treasury has never yet served any incumbent as a vestibule from the Senate to the White House.

This talk about making Isaac Pusey Gray of Indiana Secretary of Agriculture to succeed Uncle Jerry Rusk must be a mistake. Mr. Gray is a fine old gentleman, but inasmuch as he doesn't know the difference between a load of corn fodder and a hay rake, his appointment to the agricultural portfolio would be a glaring and spectacular misfit.

In many portions of Illinois it is impossible to throw a snowball in any direction without hitting some able statesman who can prove, by the strawberry mark on his left arm, that he is the Sucker State's favorite son for a place in the Cabinet. The danger now is that the question of priority on this claim may provoke the biggest row in which the many favorite sons of Illinois were engaged.

A striking illustration of the folly of the Democratic cry that the McKinley law is "a worse than war Tariff" is the fact that whereas in 1867 we were collecting \$4 65 per capita from duties on imports, which amount rose to \$5 23 per capita in 1872, last year our total revenue from customs amounted only to \$2 66 per capita. In the meantime the average rate of duties, reckoning free and dutiable goods, dropped from 44.56 per cent. in 1867 to 21.26 per cent. in 1892; the value of free importations rose from \$17,033,130 to \$458,074,604; and the percentage of total imports which came in free of duty increased from 4.5 per cent. to 50.3 per cent. The present Tariff can be no worse than the war Tariff only on the assumption that a less amount of duties per capita, a lower average rate of duties and a larger free list make it so.

PETER JACOBSON is an honest man. Some thirteen years ago he engaged for a short time in the manufacture of kitchen safes in this city, in company with W. H. Wallingford of the Fifth Ward. The business was not profitable, and Mr. Jacobson left Maysville considerably in debt. He went to Louisville and made a success. A few days ago he returned here and paid off every dollar of his indebtedness, with interest—the latter amounting to more than the principal.

Take Collier, Budd & Co., for instance; they cut a float in two yesterday and then had to burn it up to reach coal afloat outside. That little fun didn't cost them less than \$1,400. A Queer Specimen. The elevator in M. C. Russell & Son's stopped yesterday afternoon from a cause not immediately visible. A search for the unseen and unknown agent of all the trouble revealed what was once an Ohio river gar, a kind of a cross between an alligator and a water dog.

New Postal Orders. In a few days new postal money orders will go into use, says an exchange. The system is such that there is little or no complication, and at the same time it is a good way to send money. A sheet calling for amounts from 1 cent to \$5 has been prepaid, and which on payments of 1 cent and the amount to be sent will be torn off about as an express order. There will be no writing by the Postmaster, the sender endorsing it as a check or draft. The Government guarantees its transportation.

The foregoing, which has been making the rounds, finally lodged in Thursday's Bulletin. If Bro. Marsh has a desire to learn the postal laws, he can begin at once by declaring the above statement a non-such-a-thing. No such style or system of money order is contemplated by the Department. Nor would the Government guarantee such "tickets" any more than it now guarantees postal notes, which are no safer than if the same amount of currency were inclosed in a letter.
